

MOBILE SATELLITE COMMUNICATIONS

PEACE *of* MIND

Communications for Law Enforcement

Information Assured Satcoms

Genesis alliance with USSecurenet, a mobile satcoms network operator provides managed data networking over land, sea or air. We integrate Inmarsat, Iridium, Vsat and terrestrial MPLS fiber to provide seamless versatility to its customer networks.

Genesis customers have dynamic networks that expand and contract against their core on assignment. Genesis implements permanent and fixed networks with managed IP. Genesis offers collocation and full network backbone management services as well as mobile satellite solutions. VAS inside the network offer:

- Military grade, network integrated bandwidth rich video conferencing, eliminating the need for Tannenbergs or other external video conference;
- Secure managed bandwidth encrypted video conference, email, text and audio conference solutions inside with SecureConnect an exclusive Genesis product
- Co-location at Genesis data POPs in either NY or Amsterdam
- IP addressing
- Radius housing, partitioning, APN management

Why Satellite?

Genesis and USSecurenet know how important communication is to your business. We specialize in communications for US military, first responders and law enforcement.

Mobile satcoms are the phones of choice for the US military, first responders and anti-terrorism teams. The BGAN service is accessible throughout North, South and Central America, Europe, Africa, the Middle East and Asia. The Broadband Global Area Network (BGAN) is a global satellite Internet network that includes telephony using portable terminals Unlike previous satellite technology, BGAN terminals are the size of a laptop and are easily portable. Inmarsat's I4 geostationary satellite network provides USSecurenet customers with global internet and telephony access anywhere line-of-sight to a satellite exists.

Genesis, a minority owned small business is a data network operator dedicated to providing the highest level of secure communications for its American customers. Genesis specializes in managed data transport over land or mobile satellite. Genesis specializes in communications for US military, first responders and law enforcement.
